C Differently

designed by: art photographer Richard Bettinger
and McLaughlin Collection

C Differently // The C Table is an Inspired Collaboration that Joins Furniture and Photography in the world of home furnishings so much has been done the same way for so long. So it is particularly exciting when a startling new collaboration shakes up the usual subjects, and creates a whole new paradigm. With the launch of the C Table, art photographer, Richard Bettinger, and McLaughlin Collection have introduced a melding of fine art photography and high-style home furnishings which brings art to life, life to art and a whole new energy to the living space. Richard Bettinger's exploration of light in his photographs has made his work popular and award-winning; his images dance, flow and sing with vibrant colors and movement. McLaughlin Collection is one of the world's premiere creators of fine acrylic furnishings, with dramatic designs that combine modern lines with fully sustainable materials. These two creative entities have joined forces to present the C Table. Bettinger's beautiful images are realized on the horizontal tops of the table's rounded-off C shape, each crafted of pure white or inky black Lucite, and glowing with a natural shine. The versatile table can be brought close for maximum convenience and to experience the lustrous beauty of Bettinger's images more fully, as the lower part of the C is able to slip beneath sofa or chair. Or, position two C Tables side-by-side and give them prominence in the room. available at: [David Sutherland Showroom - Houston](#)
